

Taxi! A Look At Checkers Past

This hard bound book includes pictures of most all models made, up through 1974; and even goes back in time to the Checker predecessors. The article that is the main body of text was originally published in Car Classics Magazine in 1974. I have secured the copyright permission to republish this valuable history that is a must for all Checker Lovers. It is not just a Xerox of the magazine, it has been re-typeset in large print and I've made an extensive index. If you want to find out

what was happening in 1925, turn to page 21. Did you know that Checker made a Transit Bus? See page 37. Are you interested in the various wheelbase sizes? There are 18 different wheelbase sizes in the index.

The book also includes a copy of the sheet music Call a Checker Cab which was the theme song for the Checker Cabbies Radio Show. The show was broadcast on station WOR in New York circa 1930. The copy was made from an original in my possession (copyrighted too).

Last but not least, there are 30 pictures of the factory taken circa 1950 by a personal friend of the Markin family; the friend happened to be a professional photographer. These photos have never been published before; in fact, only the Markin family and the photographer have ever seen them prior to this.

The base price is \$21.00. Add appropriate amounts listed for tax and shipping.
